TYPE OF WELL AND WELL USE

Based on District Rule 2

Agricultural use – the use of groundwater for:

- (1) cultivating the soil to produce crops for human food, animal feed, or planting seed or for the production of fibers;
- (2) practicing floriculture, viticulture, silviculture, and horticulture, including the cultivation of plants in containers or non-soil media, by a nursery grower;
- (3) raising, feeding, or keeping animals for breeding purposes or for the production of food or fiber, leather, pelts, or other tangible products having a commercial value;
- (4) planting cover crops, including cover crops cultivated for transplantation, or leaving land idle for the purpose of participating in any governmental program or normal crop or livestock rotation procedure;
- (5) engaging in wildlife management as defined in Texas Tax Code Section 23.51(7); and,
- (6) raising or keeping equine animals.

Area permit application well – a well that must be registered with the Texas Commission on Environmental Quality under Texas Water Code Section 27.023(b), which is used during the development of an area permit application to obtain required pre-mining geologic, hydrologic, and water quality information.

Cased uranium exploration well – a cased well subject to a uranium exploration permit.

Commercial use - the use of groundwater to supply water to properties or establishments that are in business to build, supply or sell products, or provide goods, services or repairs and that use water in those processes, or to supply water to the business establishment primarily for employee and customer conveniences (i.e. flushing of toilets, sanitary purposes, or limited landscape watering). Does not include agricultural, livestock, industrial, or irrigation uses.

Dewatering well - an artificial excavation that is constructed to produce groundwater to lower the water table or potentiometric surface and that is not used to produce or to facilitate the production of minerals under a state regulatory program.

Domestic use - the use of groundwater by an individual or household to support domestic activity. Such use may include water for drinking, washing, or culinary purposes; for irrigation of lawns, or of a family garden and orchard; for watering domestic animals; and for water recreation including aquatic and wildlife enjoyment. Domestic use does not include water used to support activities for which consideration is given or received or for which the product of the activity is sold.

Industrial use- water used in processes designed to convert materials of a lower order of value into forms having greater usability and commercial value, including commercial fish and shellfish production, aquaculture, and the development of power by means other than hydroelectric, but does not include agricultural use.

Irrigation use - the use of water for watering crops, trees, and pasture land, including golf courses and parks that do not receive water through a municipal distribution system.

Livestock use – the use of water for the watering of livestock, poultry, or wildlife, including exotic livestock, game animals, fur-bearing animals, birds, or waterfowl and for maintaining aquatic life. Aquaculture is not livestock use. Livestock use includes watering livestock that are kept for pleasure, recreational use, or commercial use.

Monitoring well – well used to measure or monitor the level, quality, quantity, or movement of subsurface water that is not used in conjunction with the production of oil, gas, or other minerals.

Piezometer well – a well of a temporary nature constructed to monitor well standards for the purpose of measuring water levels or used for the installation of a piezometer resulting in the determination of locations and depths of permanent monitor wells.

Public Water Supply Well – a well used as the source of water for a public water system as defined in 30 Texas Administrative Code Section 290.38(47).

Recovery well – a well constructed for the purpose of recovering undesirable groundwater for treatment or removal of contamination.

Regulated uranium exploration well – a well that is subject to District Rules regarding registration, production, or reporting under Rule 9.1.A(4).

Temporary rig supply well– a well supplying water to a rig actively engaged in drilling or exploration operations for an oil or gas well permitted by the Railroad Commission of Texas, including drilling or workover rigs. Exploration operations include well completion and workover, including hydraulic fracturing operations.

Test well – A well drilled to explore for groundwater.
